Class schedule: Saturday, Jan. \_\_ 2019 AND Saturday, Jan. \_\_, 2019, 9am to 3pm

### One Block Wonder Supply List

Six (6) repeats of \*preferably 24" repeat fabric  
plus one yard for borders if you choose

#### **DO NOT LAUNDER YOUR FABRIC !!!**

60 degree (equilateral triangle) ruler to accommodate a 3.75" cut

Large cutting mat

6"x24" ruler

rotary cutter with new blade (you will be cutting through 6 layers of fabric)

a lot of straight pins - at least **24 flat heads**, others can be whatever.

You will have approx. 100+ hexies, so be governed accordingly.

Sewing machine, clean and oiled with new needle

filled bobbin

neutral construction thread

Quarter inch foot (important)

and, since we all have to frog once in a while, a seam ripper

a piece of batting about 80" by 90" to be used as your "design wall" (this can wait until 2<sup>nd</sup> session)

The book "One-Block Wonders" by Maxine Rosenthal if you have it

AND your lunch

This is a fun class where we will reveal the wonders hiding within our fabric.

During the **first session**, we will begin cutting our fabric and sewing some half hexagons to get the gist of it. Then, you go home and complete cutting your triangles and complete sewing your half hexagons.

I say half hexagons because you will pin the two halves together, ready for the next session. DO NOT sew them into one complete hexagon or you will spend a lot of time unsewing. Jus sayin

During the **second session** 2 weeks later, come prepared to start putting your completed half hexagons up on the design wall to explore layout options. If you have a plastic tablecloth with flocked backing, or batting covered foam board, etc., you can bring it so you will be able to carry your "design wall" home to complete sewing your project.

Every quilt is entirely different from any other, because of the way the fabric is cut, the way the hexagons are sewn together, and the way each quilter chooses to lay out the hexagons to create the quilt. It is fun to see each of the quilts come alive.

\*If you choose a 12" repeat, then purchase 12 repeats (with this choice, you may have more identical hexagons)
